

ROYAL BOTANIC GARDENS,

KEW, SURREY.

DIRECTOR'S OFFICE.

19 Sep. 1916

My dear Colleague

On receipt of your letter of 25<sup>th</sup> Aug<sup>t</sup>. with material of an Apocynaceous species from S. Thomé I handed the material to my Colleague Dr Stapf who has studied the African Apocynaceae. Perhaps I cannot do better than enclose in original the memorandum on the subject which Dr Stapf has submitted to me as it explains fully how the matter stands.

If it should be possible to send the further information to which Dr Stapf alludes I know he will very gladly do what he can to supply a definite determination.

Believe me to be

Yours very sincerely

D. Prain
