

Mell. *Potamo furcus*
5. 5. 84

My Dear Sir,

You were so good to send me for these
Girders in the latter part of 1880; a supply of seeds
and Bulbs (14 Bulbs 2p Seeds) these were indeed very
acceptable some, (indeed a very great many) being
quite new to us!

I have now the pleasure ^{to advise you of the} supply of a package
by post containing 156 species of seeds of the Country
and New Zealand, which was sent on 12. March 1884 to
your address. It was merely directed "The Director
Potamo Gardens, Coimbra &c." I trust you have by
this time received it?

I enclose you a list of plants of which seeds
would be most acceptable, and shall be very much
obliged if you will favour me with any or all of them.

By an early mail you will receive a copy of
the new Catalogue of the plants contained in the
Gardens.

With compliments

Believe me, (in haste)

Yours
Dr. J. L. Henriques
Director, Botanic Gardens
University of
Coimbra.

my dear Sir,

yours very sincerely

W. R. Gifford
Director
